

What Khan Academy Can Help Teacher and student?

Khan Academy offers powerful benefits for both **teachers** and **students**, supporting learning, instruction, and classroom management — all for **free**. Here's how:

How Khan Academy Helps Teachers:

1. Free Teaching Resources

- Ready-made lesson videos, quizzes, and practice exercises aligned with global standards (like Common Core or NCERT).

2. Personalized Learning for Students

- Teachers can assign specific lessons or let students work at their own pace with adaptive learning paths.

3. Progress Tracking

- Dashboards show real-time data on student performance, mastery levels, and time spent on tasks.

4. Classroom Differentiation

- Easily support diverse learners by giving extra practice to struggling students and challenges to advanced ones.

5. Homework & Assessment Tool

- Assign practice problems, monitor completion, and assess understanding instantly.

6. Aligned Curriculum Support

- Content is aligned with school curricula in subjects like math, science, and computing.

7. Teacher Training and Guides

- Offers onboarding videos and step-by-step guides to help educators use the platform effectively.

How Khan Academy Helps Students:

1. Learn at Their Own Pace

- Students can pause, rewind, or re-watch videos until they fully understand a topic.

2. Instant Feedback

- Interactive quizzes show whether an answer is correct and explain mistakes in real time.

3. Gamified Learning

- Points, badges, and energy points make learning fun and engaging.

4. Builds Confidence

- Step-by-step explanations and scaffolded problems help learners improve gradually.

5. Covers Many Subjects

- From basic math to calculus, biology, history, coding, and more — all in one place.

6. No Cost, No Ads

- 100% free and safe for use at home or school, with no commercial distractions.

7. Mobile Friendly

- Available via app or browser, making it easy to learn anywhere.
